

Lockpicking my parents Safe!

My parents purchased a safe to store our
confiscated devices

Why did I do it ?

I do it because my mother confiscated my phone and my brother's phone

I wanted my phone to speak with my friends and play

The idea

My brother started to say “We should have a drone to see the safe code” so we can have our phones back

How did I do it ?

I started to look in my home for a little camera

I used the camera of my mother because it's very small, then I looked how to place it opposite to the safe.

I used a chair to simulate the size of my mother and position the camera over.

I had to do three or four tests before to find the perfect position

How did I do it ?

I had to wait for my mother to open the safe

It happens when my brother needed his phone
for an event

So I get the safe code from the video

I'm a hacker not a thief
